

Fun things to do

Bat puppet - sheet 1 of 2

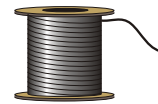

You will need:

Bat puppet template sheet

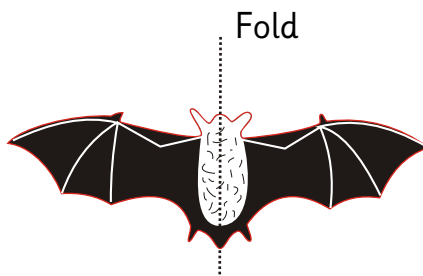

Glue stick

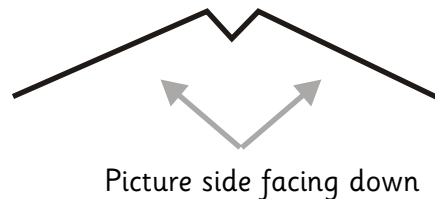

Cotton

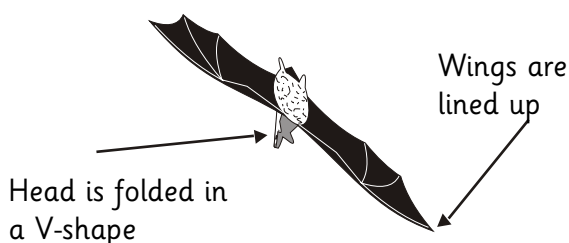

- 1 Cut out both bat shapes on the template sheet. Fold the bat shape with the head along the centre of its body to make a nose and tail.

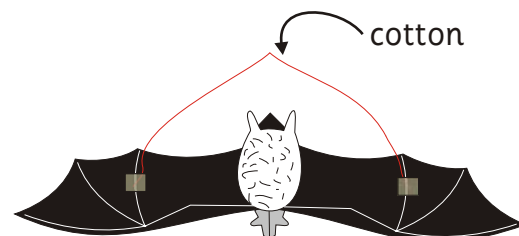

- 2 Then fold the wings downwards, so that the bat shape with the head looks like this from the front.

- 3 Take the bat shape without the head. Completely cover the side without the drawing with glue. Stick this on top of the folded bat shape, making sure to line up the ends of the wings.

- 4 Fold along the 'fingers' of each wing'. Stick a long piece of cotton to the wings as shown below. This can either be hung from the ceiling or from a thin stick.

Top tip:

- Why not make several bats and make your own 'canal tunnel' to hang your bats from?

Bat puppet template - sheet 2 of 2
